

Our Philosophy - Our Values

Our core business has since 1963 been the maintenance and repair of commercial vehicles. Over the years, one of our main targets has been to adapt to customer requirements. To continue to achieve this goal we focus on:

- further education and training of our longstanding employees
- implementation of certified quality controls
- use of the latest Iveco Diagnostic Tools

We owe it to our employees and our environment to be a reliable and considerate partner.

For years, we have helped train young people for different professions. We will continue on this course to present an effective team, fit and ready to fulfill customer requirements.
